Filed January 8, 2002 : Examiner Gary W. Counts

CHROMATOGRAPHY MEDIUM : Mail Stop Amendment

AND ITS MANUFACTURING METHOD

## RESPONSE

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450 COMMISSIONER IS AUTHORIZED OF CHARGE ANY DEFICIENCY IN THE FEES FOR THIS PAPER TO DEPOSIT COOLINT NO. 23-0975

Sir:

Responsive to the Office Action of September 9, 2005, Applicants submit the following remarks in support of the patentability of the presently claimed invention over the disclosure of the references relied upon by the Examiner in rejecting the claims. Further and favorable reconsideration is respectfully requested in view of these remarks.

Thus, the rejection of claims 5, 12, 27, 31, 41, 45, 53 and 60 under 35 U.S.C. § 103(a) as being unpatentable over Chu in view of Nanbu et al. or Uenoyama et al. is respectfully traversed.

## The Examiner's Position

It is the position of the Examiner that Chu discloses a device comprising a porous reaction membrane and at least one receptor, a method of making the device, and applying a surfactant (surface active agent) to the reaction membrane and allowing it to dry. The Examiner further states that Chu teaches the surfactant can be polyoxyethylene (23), polyoxyethylene sorbitan monolaurate or polyoxyethylene sorbitan monoleate. The Examiner admits that Chu fails to teach a surface active agent comprising sugar in a hydrophilic part of the surface active agent.
